ABOUT US

First Impression is the last impression Inspired by this principal rule of the interior design industry. IPL started this state of the art facility for the manufacturing of Decorative High pressure Laminates. Decorative laminates are used to customize and beautify the surface of plywood and other base materials so as to suite the aesthetics and interiors of any given space.

We have also incorporated a 7-point Quality Control System to ensure that every single one of our laminate sheet goes through seven different quality control check points during its production period. Our consistent and strategic quality control system, all the way from raw material input level to finished goods level has accredited us with ISI 2048: 1995 certification. Our modern and E-governed management protocols has accredited us with the prestigious ISO 9001: 2015 certifications Our ability to minimize harmful effects on the environment and to achieve continual improvement of our environment performance has enabled us to get certified with ISO 14001 2015 Moreover, Laminates produced in our facility also meet the British European Standard BS EN 438 and the American NEMA LD3 standard.

Our facility has a state-of-art chemical plant, which manufactures resins in the production of laminates. Having a modern plant allows plant allows our R&D Team to experiment with innovative materials to produce quality resins that will that will stand the test of time.
