A Commitment To Excellence

FIGURE WOODZTM

DESIGNER DOOR SKINS

FIGURE WOODZ™

DESIGNER DOOR SKINS

ABOUT US:

"First impression is the last impression." Inspired by this principal rule of the interior design industry. Durian, a national leader in the furniture market, started its state-of-art facility for the manufacturing of decorative High Pressure Laminates. Decorative laminates are used to customize and beautify the surface of plywood and other base materials so as to suite the aesthetics and interiors of any given space.

We have also incorporated a 7-point Quality Control System to ensures that every single one of the laminates sheets goes through seven different quality control check points during its production period. Our consistent and strategic quality control systems, all the way from the raw material input level to the finished goods level has accredited us with ISI 2046 : 1995 certification. Our modern and a governed management protocols have accredited us with the prestigious ISO 9001 : 2008 certification. One ability to minimize harmful effects on the environment and to achieve continual improvement of our environmental performance has enabled us to get certified with ISO 14001 : 2004. Moreover, laminates produced in our facility also meets the British European Standard BS EN 438 and the American NEMALD - 3 standards.

Our facility has a state-of-the-art chemical plant, which manufacture refined in the production of laminates. Having a modern plant allows our R&D team to experiment with innovative materials to produce quality resins that will stand the test of time. As a result, we are the only brand in the country to offer BFT (Borer, Fungus, Termite) Guard for all our laminates.

* Products are available as FSC®certified upon request

Type	: Conventional standard cold press interior grade laminate
Thickness	: 0.92 mm
Size	: 7' X 3' ± 10% (As per ISI Standard)
Product Standard	: Comprising to
	• British European Standard : BS EN 438
	• American NEMA LD 3,
	• BIS (Bureau of Indian Standard) IS:2046
	• BIS (Bureau of Indian Standard) IS:2036
	Grade P1 Phenolic/Electronic Insulation.
	• ISO 4586.

PRODUCT CARE AND MAINTENANCE

For cleaning the surface of the laminates, use dry cloth to wipe the stains, if needed can use ordinary liquid detergent (non-acidic) or ammoniated liquid. After taking a trial on small portion, Stain remover or Industrial organic solvents can be used to remove stubborn stains in case if there is no problem. One should not use, wire or hard-plastic brushes, and abrasives to clean the surface.

The LUSTROUS Facades and Wood collection are specially made laminates to give bright optical view. The properties of these laminates are very sensitivity and thus should be used only for vertical applications. While cleaning these laminates use only dry cloth or wet damp cloth in natural water only.

Since, conventional laminates are made for interior decorations, should not be used for external use where there are chances for direct exposure to sunlight or any other sort of direct heat.

It is always recommended to keep the substrate horizontal while pasting the laminates. Immediate removal of pressure and vertical application should not be practiced.

Samples pasted in the folder represents the finish & design and not the actual thickness.
