DECORATIVE LAMINATES

A Commitment To Excellence

ABOUT US

“First impression is the last impression.” Inspired by this principal rule of the interior design industry, Endeavour started its state-of-the-art facility for the manufacturing of Decorative High-Pressure Laminates. Decorative Laminate are used to customize and beautiful the surface of plywood and other base materials so as to suite aesthetics and interior of any given space.

We have also incorporated a 7-point Quality control system to ensure that every single sheet one of our laminate goes through seven different quality control checkpoints during its production period. Our consistent and strategic quality control system, all the way from raw material input level to finished goods level has accredited us with ISI 2048:1995 certification. Our modern and E-governed management protocol has accredited us with the prestigious ISO 9001:2008 certification. Our ability to minimize harmful effects on the environment and to achieve continual improvement of our environment performance has enable us to get certified with ISO 14001:2004. Moreover, Laminates produced in our facility also meet the British European Standard BSEN 438 and American NEMALD 3 standard.

PRODUCT CARE AND MAINTENANCE
For cleaning the surface of the laminates, use dry cloth to wipe the stains. If needed can use ordinary liquid detergent (non-acidic) or ammoniated liquid. After taking a trial on small portion. Stain remover or Industrial organic solvents can be used to remove stubborn stains in case if there is no problem. One should not use, wire or hard-plastic brushes, and abrasives to clean the surface.
The LUSTROUS Fancies and Wood collection are specially made laminates to give bright optical view. The properties of these laminates are very sensitivity and thus should be used only for vertical applications. While cleaning these laminates use only dry cloth or wet damp cloth in natural water only.
Since, conventional laminates are made for interior decorations, should not be used for external use where there are chances for direct exposure to sunlight or any other sort of direct heat.
It is always recommended to keep the substrate horizontal while pasting the laminates, Immediate removal of pressure and vertical application should not be practiced.
Samples pasted in the folder represents the finish & design and not the actual thickness.
